Professional Experience

Software Engineer, 100 Devs [↗](#)

2020 – Current
USA

Whether you need a progressive web app, or a full-stack web app, we develop it at 100 Devs through collaboration with over 100 developers. Creating custom web apps is what we do.

- Creating software that is adaptable to customer focused technology.
- Following semantic programming and documentation methodologies.
- Designing and developing software using documented algorithms and methodologies for scalability and maintainable code.
- Analyzing customer focused software to plan the implementation of software technologies.
- Working with teams on technical challenges including software maintainability and scalability.
- Collaboration and communication between engineers on projects.
- Continuously learning new skillsets and technologies to meet customer needs.

Education

Computer Science, Portland Community College [↗](#)

Expected graduation
2022

- Understand usage of computer hardware components and software languages.
- Integrate computer science elements into real world solutions.
- Have a understanding of programming principles and concepts.
- Life long learner of new technologies and skillsets.

Projects

Social Again App [↗](#)

GitHub [↗](#)

- JavaScript, Node, Mongo DB, Express, EJS, CSS, HTML.
- Lazy loading of images for faster performance.
- Nested comments for communication.
- Customized portfolios and tech stack icons individualized for each person.
- Sharing of contact information such as phone numbers, and personal websites.

Fizz Buzz Checker [↗](#)

GitHub [↗](#)

- Static JavaScript / CSS / HTML website that checks if a number is divisible by 2, 3 or both.
