Summary

I'm a Software Engineer focused on Full-Stack Web Development. I am proficient in both front-end and back-end development. I have knowledge in Javascript, React, Node.js, MongoDB, CSS, HTML and GitHub. As a software engineer I aspire to help bring projects to life and demonstrate my commitment to developing world-class software solutions for companies and customers. I am also open to learning new languages, libraries and frameworks whichever enhances the customers experience. Creating Cool Cross Platform Mobile Apps is my passion.

- Full-Stack Developer
- Javascript
- React
- Node
- Github
- NoSQL
- MongoDB
- CSS
- HTML
- NPM libraries and frameworks
- CMS frameworks
- Adobe Suite

Experience

Software Engineer

100Devs

Sep 2020 - Present (1 year 1 month +)

Whether you need a progressive web app , or a full-stack web app, we develop it at 100 Devs through collaboration with over 100 developers. Creating custom web apps is what we do.

- Creating software that is adaptable to customer focused technology.
- Following semantic programming and documentation methodologies.
- Designing and developing software using documented algorithms and methodologies for scalability - and maintainable code.
- Analyzing customer focused software to plan the implementation of software technologies.

- Working with teams on technical challenges including software maintainability and scalability.
- Collaboration and communication between engineers on projects.
- Continuously learning new skillsets and technologies to meet customer needs

Web Development

Brian Reed Web Solutions

Sep 2020 - Present (1 year 1 month +)
